I. Meeting Objectives

1. 7th meeting with the client:

Present the development progress on our system:

- Finish the candidate login page
 - candidate can login with the email address and initial password
 - candidate can modify password
- Finished the candidate profile page
 - candidate can modify his/her name
- Finished the candidate answering test problems page
 - candidate can directly input answers into the box and save them
 - candidate can save the current answers and logout
 - candidate can continue answering the previously saved answers
 - candidate cannot modify answers after submitting
- Finished the admin modify password page
 - admin can modify password
- Finished the admin send email function, and before sending the state of candidate account. will be validated
 - if the candidate account is not existing, the account will be created
 - if the candidate account is existing and the he/she has NO in progressing test, the email will be sent
 - if the candidate account is existing and the he/she has in progressing test, the email will NOT be sent

Feedback for the development from the client:

- Show expiry time on the candidate answering test problems page
 - candidate should know how much time remain when he/she is answering the test problems
 - when expiry time is up, the system will automatically submit the current work of candidate, and it cannot be modified
- Popup message of submission
 - when candidate submit his/her test, the popup message should contain the following content
“You will not be able to modify your answers after submission.”
- Candidate profile
 - add the contact number of candidates on the candidate profile page

- The comment function for admin
 - admins should be able to add some comments to the tests submitted by candidates
2. Final demonstration preparation
 - complete the compilation function
 - fix the defects according to the client' s feedback

3. Team internal meeting
 - discussing about the final presentation allocation
 - discussing about the mystery presentation allocation
 - discussing about the testing issues

4. Other issue

Tim (Lantian Cai) was late for the milestone 2 presentation and Khate replaced him. Therefore, Tim will be allocated to the final demonstration.

II. Action Items

| # | Description | Owner | Status |
|---|---|----------------------|-------------|
| 1 | Milestone 2 demonstration | Kalpana & Khate | Completed |
| 2 | System development continuing | Khate, Arnold & Nick | In Progress |
| 3 | Testing cases design | Kalpana & Tim | In Progress |
| 4 | Final Software Process and Management Plan (SPMP) | Kina | In Progress |
| 5 | Final Software Requirement Specification (SRS) | John | In Progress |
| 6 | Final Software Design Document (SDD) | Sai | In Progress |
